

PRODUCT DATASHEET

Confidex Ironside Classic™

The most durable tag for challenging industrial asset management applications

ELECTRICAL SPECIFICATION

Device type

UHF RFID / EPCglobal Gen2v2

Operational frequency

Global: 860 - 960 MHz

ETSI: 865 - 869 MHz

FCC: 902 - 928 MHz

IC options and memory configuration

Impinj M4QT™ - EPC 128 bit; User 512 bit; TID 96 bit

Impinj M4E™ - EPC 496 bit; User 128 bit; TID 96 bit

Impinj MR6-P™ - EPC 96/128 bit; User 32/64 bit; TID 96 bit

EPC memory content

Unique number encoded as a default

Read range (2W ERP)*

Global variant

- ETSI on metal up to 9 m / 30 ft
- FCC on metal up to 7 m / 23 ft
- On plastic 3 m / 10 ft

ETSI variant

- On metal up to 15 m / 50 ft
- On plastic 5 m / 16 ft

FCC variant

- On metal up to 15 m / 50 ft
- On plastic 7 m / 23 ft

Applicable surface materials*

Works on any material but optimized for metal.

* Read ranges are theoretical values that are calculated for non-reflective environment, in where antennas with optimum directivity are used with maximum allowed operating power according to ETSI EN 302 208 (2W ERP). Different surface materials may have an effect on performance.

MECHANICAL SPECIFICATION

Tag materials

High quality engineering plastics. Surface thermoplastic elastomer.

Standard compliancy

SAE AS5678

Weight

22 g

Delivery format

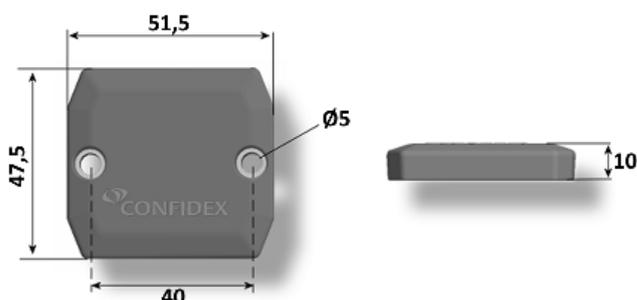

Single

Amount in box

500pcs

Dimensions

51,5 x 47,5 x 10 mm / 2.03 x 1.87 x 0.39 in

ENVIRONMENTAL RESISTANCE

Operating temperature

-40°C to +85°C / -40°F to +185°F

Ambient temperature

-55°C (for 3h) to +105°C / -67°F (for 3h) to +221°F

Peak temperature

+125°C / +257°F 1h duration

IP classification

IP68

Weather ability

Excellent, including UV-resistance and sea water

Pressure resistance

170kPa for 10min

Vibration resistance

- JESD22-B103B, service condition 2; vibration that is aligned with tag thickness (z-axis)

- RTCA DO-160 Rev E 8.5

Operational shock

RTCA DO-160 Rev E 7.2

Chemical resistance

No physical or performance changes in:

- 168 hour Motor oil exposure
- 168 hour Salt water (salinity 10%) exposure
- 168 hour Sulfuric acid (10%, pH 2) exposure
- 24 hour NaOH (10%, pH 13) exposure

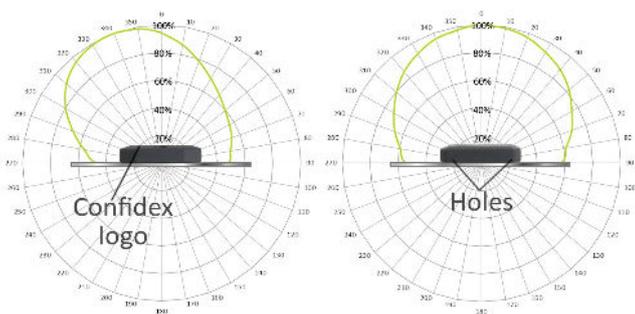

Generally good against: Methanol (moderate concentrations), ethanol (moderate concentrations), glycerine, ethylene glycol, consistent grease, most acids, bases and tensides such as sulfuric acid 96%, nitric acid 10%, NaOH 50%, soap solution 30%. Testing recommended for hydrocarbons and some of the carboxylic acids. Acetone should be avoided.

Expected lifetime

Years in normal operating conditions

Values in the table are the best recommendations; resistance against environmental conditions depends on the combination of all influencing factors, exposure duration and chemical concentrations. Thus, product's final suitability for certain environmental conditions is recommended to be tested. Contact Confidex for more specific information.

RADIATION PATTERNS

PERSONALIZATION OPTIONS

Pre-encoding

- Customer specific encoding of EPC or user memory. Locking permanently or with password.

Customized laser engraving

- Customer specific layout including logo, text, numbers.

INSTALLATION INSTRUCTIONS

Confidex Ironside Classic™ can be attached with several fixing methods:

1. 3M 300LSE high performance acrylic adhesive

When optional background adhesive is ordered the tag is delivered with adhesive attached. When mounting the tag, clean and dry the surface for obtaining the maximum bond strength. Ideal application temperature is from +21°C to +38°C (+70°F to +100°F), bond strength can be improved with firm application pressure and moderate heating from +38°C to +54°C (+100°F to +130°F). Installation at temperatures below 10°C (50°F) is not recommended.

2. Structural adhesive

Structural adhesives such as 3M DP110 and SikaFast 5215 provide very high bond strength and resistance against mechanical stress. When tag is attached with structural adhesive, insert a layer of adhesive under the tag and press the tag on the surface. Increase the bond by adding extra sealant from the tag holes. Insert maximum 2mm layer of adhesive under the tag. Please contact adhesive supplier for exact fixing instructions.

3. Mechanical fixing
 - Screws (size M4)
 - Pop rivets (size 4mm)

Mechanical fixing is always recommended for applications that includes risk for high mechanical stress or low temperature during the fixing. Make sure there is no air gap left in between the metal surface and tag.

4. Additional fixing tools
 - Welding bracket

When the application is too demanding for adhesives, but the metal surface cannot be punched for screw or rivet fixing, welding the tag with special bracket is an option for attachment. Welding bracket is made of stainless steel and delivered ready attached to tag with pop rivets. Bracket design allows attachment on both flat and curved surfaces.

With all attachment methods the optimal performance is achieved when there is metal left above the tag. Tag orientation as shown with arrow should be considered when using linear reader antennas.

ORDER INFORMATION

- Product number:** 3000319
Product name: Confidex Ironside Classic™ M4QT
- Product number:** 3000616
Product name: Confidex Ironside Classic™ M4E
- Product number:** 3003443
Product name: Confidex Ironside Classic™ MR6-P ETSI
- Product number:** 3003444
Product name: Confidex Ironside Classic™ MR6-P FCC

For other versions, additional information and technical support please contact Confidex Ltd.

DISCLAIMER
THE MATERIALS, PRODUCTS AND SERVICES ARE SOLD SUBJECT TO ITS STANDARD CONDITIONS OF SALE, WHICH ARE INCLUDED IN THE APPLICABLE DISTRIBUTOR OR OTHER SALES AGREEMENT. ALTHOUGH ANY INFORMATION, RECOMMENDATIONS, OR ADVICE CONTAINED HEREIN IS GIVEN IN GOOD FAITH, CONFIDEX MAKES NO WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, (i) THAT THE RESULTS DESCRIBED HEREIN WILL BE OBTAINED UNDER END-USE CONDITIONS, OR (ii) AS TO THE EFFECTIVENESS OR SAFETY OF ANY DESIGN INCORPORATING ITS PRODUCTS, MATERIALS, SERVICES, RECOMMENDATIONS OR ADVICE. EXCEPT AS PROVIDED IN CONFIDEX STANDARD CONDITIONS OF SALE, CONFIDEX AND ITS REPRESENTATIVES SHALL IN NO EVENT BE RESPONSIBLE FOR ANY LOSS RESULTING FROM ANY USE OF ITS MATERIALS, PRODUCTS OR SERVICES DESCRIBED HEREIN.

Each user bears full responsibility for making its own determination as to the suitability of Confidex products, materials, services, recommendations, or advice for its own particular use. Each user must identify and perform all tests and analyses necessary to assure that its finished systems incorporating Confidex products, materials, or services will be safe and suitable for use under end-use conditions.
